

Slider / Banner Problem

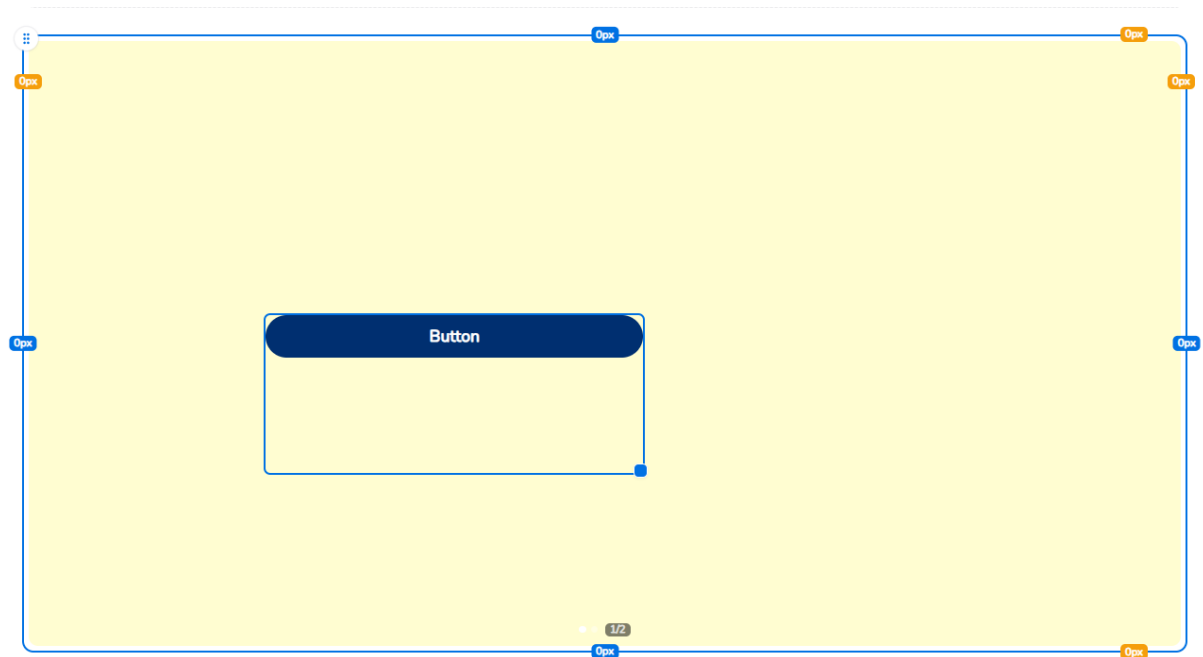

1. Text punya placeholder. By default warna putih, text terus tak Nampak. Text juga sy nak tambah jenis Header Text/title/paragraph

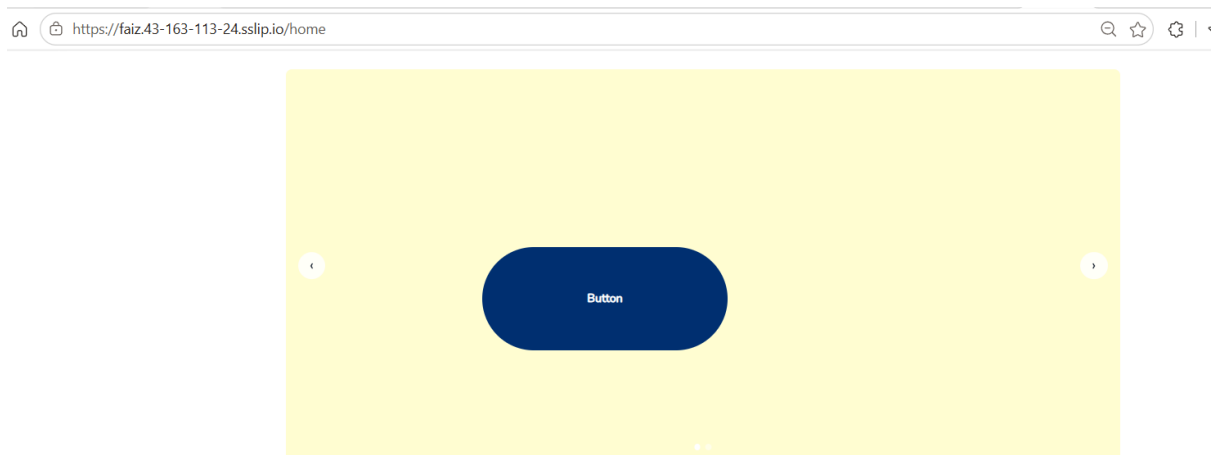

2. Button kt live edit x besar ikut wrap dia. Tapi lps publish kat live dia jd besar ikut yg tu. Tengok free position kt sini : x dan y = 0, sampai situ je dia punya position, tak boleh nak tarik2 letak kat area lain. Sy nak mcm konsep canva, boleh tarik kat mana2. Cuma pastikan automatik ekjas utk mobile /tablet, dlm masa yg sama boleh spesifik susun khas kt mobile/tab. Then button typography punay alignment tak berfungsi.

Ni live edit mode

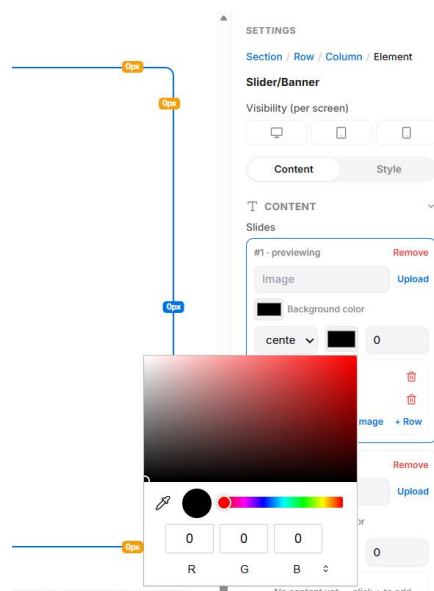

Ni published page kat browser. Tak sama!

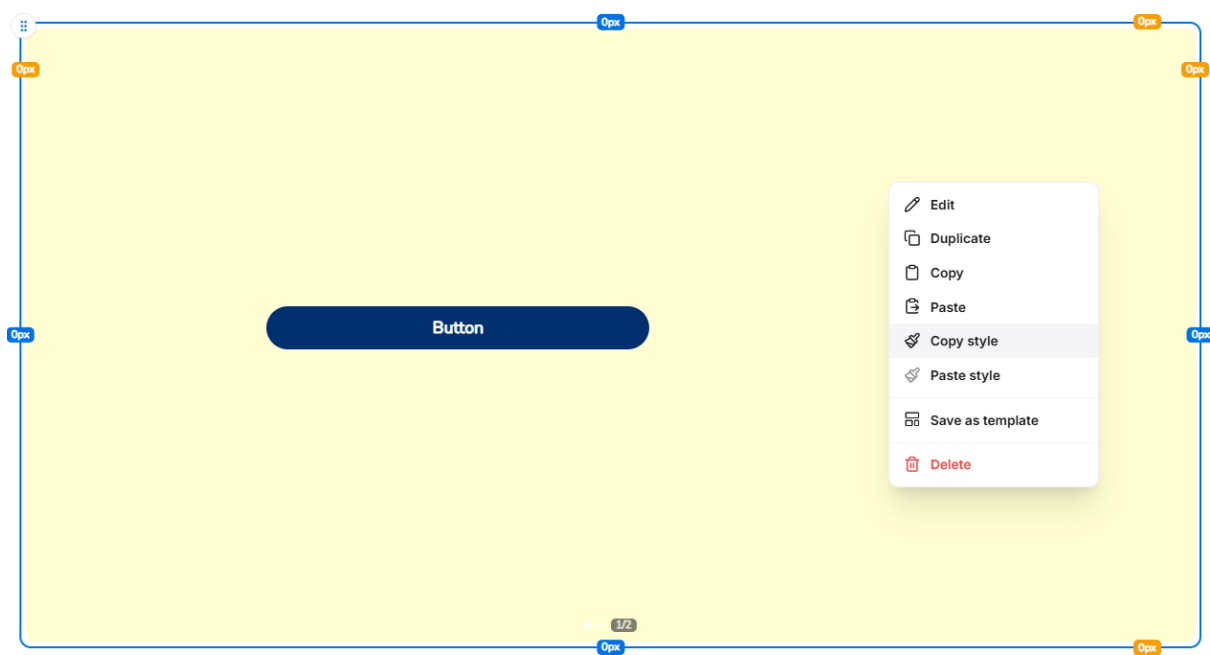

3. utk content kat slide, imej boleh upload, dlm masa yg sama boleh pilih dari library media yg dah di-upload sblm ni. Background color kenapa bydefault warna hitam tapi kt

live tak hitam pun. Overlay color kene hover dlu baru tau (UI UX tak bagus)

4. Copy Style dan paste Style tak berfungsi utk slider/banner :

Sila semak semua features kat slider ni. Banyak sangat bug!!!!!! Dan ada yg susah nak faham.
